SUPPORTING IMPLEMENTATION OF THE NDCS: THE ROLE OF CARBON PRICING AND FISCAL POLICIES

The German Pavilion, Bonn Zone | 9 November, 14:30-16:00
EVENT SUMMARY

Fiscal policies such as carbon pricing and fossil fuel subsidy reform can mobilise revenues for climate finance and provide a cost-effective approach to reducing GHG emissions. The role of such instruments in supporting climate action is increasingly recognized and over 90 countries included some form of fiscal policies in their NDCs. This event examines the role of carbon pricing and fiscal policies in implementing the NDCs. It will bring together a panel of experts to discuss countries' commitments on fiscal policies in their NDCs, challenges faced and what still needs to be done to meet the Paris targets.

This event is jointly organized by the Green Fiscal Policy Network together with BMUB and other network partners. For more information see www.greenfiscalpolicy.org.

INVITED SPEAKERS AND PANELLISTS

Dr. Joy Kim
Senior Economic Affairs Officer, Economy Division, UN Environment (moderator)

Dr. Silke Karcher
Head of Division “European Climate and Energy Policy; New Market Mechanisms”, German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety
